PROFESSIONAL SUMMARY

Information Science undergraduate with experience building full-stack and AI-powered applications using Node.js, React Native and Azure. Skilled in designing scalable REST APIs, cloud-integrated solutions, and mobile applications. Passionate about solving real-world problems through software engineering and continuously learning modern technologies.

SKILLS

- **Languages & Scripting:** Java, JavaScript, C, SQL
- **Full-Stack Development:** React.js, CSS, HTML, Node.js, RESTful APIs, Postman
- **Cloud & Infrastructure:** AWS (EC2, S3), Git, Linux/Bash basics
- **Core CS Fundamentals:** Data Structures & Algorithms, Object-Oriented Programming, Database fundamentals, Operating System, Computer Networks

PROJECTS

- **ThejGPT : Conversational AI Web Platform** May 2026
 - Engineered a scalable full-stack conversational AI platform with real-time prompt processing, persistent session management, and modular client-server architecture.
 - Integrated LLM-powered inference through secure REST APIs, optimizing asynchronous request handling, state management, and responsive user interactions.
 - **Tech Stack:** React.js, JavaScript (ES6+), Node.js, Express.js, MongoDB, Gemini API, REST APIs, HTML5, CSS3
- **VoxAI: Inclusive Voice-First E-Commerce Platform** Nov 2025
 - Architected modular cloud backend services integrating Gemini API and Firebase to process real-time multilingual NLP payloads with minimal service latency.
 - Integrated Razorpay API gateway using strict exception handling to ensure reliable data consistency and secure checkout transactional flows.
 - **Tech Stack:** JavaScript, Gemini API, Firebase, REST APIs, Razorpay
- **SympCheck — Rural Healthcare Triage Companion** Sept 2025
 - Designed and engineered a resilient, rule-based decision-support backend using Python (Flask) and Microsoft Azure, ensuring high-availability access to secure triage classifications.
 - Architected a secure mobile-first application integrating real-time location tracking and a highly available SOS escalation protocol for immediate failover communication.
 - **Tech Stack:** React Native, Python (Flask), JavaScript, Location APIs, Microsoft Azure

WORK EXPERIENCE

- **ExamDojo ,Mathematics Content Analyst Intern (Freelance)** Remote, May 2025 – Apr 2026
 - Validated complex mathematical algorithms and data models for logical accuracy, acting as a final QA gatekeeper to ensure 100 % data fidelity against standardized verification metrics
- Automated structural rendering of diagrams and graphical tracking arrays using Matplotlib (Python) and clean semantic HTML, dramatically lowering formatting errors and improving presentation standards.

EDUCATION

- **B.E in Information Science and Engineering** Mangalore
Canara Engineering College (CGPA: 8.6) 2023 – Present
- **Pre-University Education — PCMB** Udupi
Poorna Prajna PU College (Percentage: 86.3%) 2020 – 2022

CERTIFICATIONS & HONORS

- **Hackathon Finalist** — Selected among the top 35 teams out of 10,000+ participants in the AINNOVATION 2025 Hackathon by NMAMIT, Kyndryl & Microsoft.
- **Microsoft Azure Learning Challenge** — Completed cloud infrastructure track focusing on core Azure administration and monitoring components.
- **Programming in Java** — Earned certification from NPTEL, IIT Kharagpur, mastering object-oriented paradigms and data structures.
- **C Programming** — Completed certification through IIT Bombay Spoken Tutorial, solidifying foundational memory management concepts.

LEADERSHIP & ACTIVITIES

- **AI Club Advisor**, Canara Engineering College 2024 — Present
 - Mentored junior engineers on scalable AI project architectures and technical deployment workflows.
- **Vice President, Student Council**, Canara Engineering College 2025 — Present
 - Led and coordinated large-scale operations, managed cross-functional student teams.
